Allowable Subject Matter

1. **Claims 11-17** are allowed.

The following is an examiner's statement of reasons for allowance:

Independent claim 11: the prior art of record fails to disclose the panel structure having first and second edge strips on either side of the panel, each strip having a mounting member receiving area, a biasing member with ends attached to the ends of the edge strip, the edge strips have a panel receiving recess extending from an edge, the edge strips have an arcuate channel spaced from the panel receiving recess, a longitudinal slot extending from the arcuate channel to the edge of the strip and the longitudinal slot is dimensioned such that the spacing between side surfaces of the longitudinal slot is less than the diameter of the arcuate channel, and an enlarged receiving cavity is proximate the mounting member that extends from the arcuate channel and intersecting the longitudinal slot.

Independent claim 12: the prior art of record fails to disclose a flexible panel having first and second edge strips cooperating with first and second side edges of the panel, the edge strips each have at least one mounting member receiving area dimensioned to receive a mounting member and a biasing member having ends attached to the first and second edge strips, the edge strips have a receiving recess for receiving the panel, the first and second edge strips each have an arcuate channel spaced from the receiving recess and the mounting member receiving area has at least one mounting member receiving slot with a longitudinal axis being perpendicular to the longitudinal axis of the arcuate channel.

Independent claim 14: the prior art of record fails to disclose a suspended ceiling structure having a flexible panel, a strip cooperating with an edge portion of the panel and having a mounting member receiving area, the mounting member receiving area having at least one receiving slot to receive a mounting member, an arcuate channel provided in the strip that is spaced from the panel receiving recess and proximate to an edge of the strip, a mounting member cooperating with the strip, and a pin insertable in the end of the arcuate channel and having a clip receiving recess proximate an end of the pin, the recess alignable with the mounting member receiving slot.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
